Blog Post

Everyone knows the pain of accidentally deleting a file that they didn't mean to. It's a heart-sinking moment when you realize what you've done. All is not lost, though, as there may be a way to retrieve your lost files, even if you didn't have an [Android cloud backup](#) set up first. Depending on the nature of the file, how thoroughly you deleted it, and how lucky you are, a few Android data recovery methods may work. Here are some of the best techniques for retrieving lost files.

QUICK ANSWER

To retrieve lost files on Android, you can use a few different methods, starting with simply checking the recycle bin, checking your cloud backups, using recovery apps for PC or Android, and even contacting the developer. However, it's important to remember that there is no guarantee of retrieving lost Android files.

Why Blog /Website

1. Passion
2. Earn Money
3. Name & Fame

Earning Opportunities from Blog

How Much Earning ?

Is it more than Govt Jobs ?

Is it safe and Genuine/Honest way ?

Earning Opportunities from Blog

How Much Earning ?

Earning Opportunities from Blog

Is it more than Govt Jobs ?

Earning Opportunities from Blog

Is it safe and **Genuine/ Honest** way ?

**Absolutely Genuine, Honest and
Legitimate way of earning Money**

Earning Sources using Blog

1. **Google Adsense - Advertisement Partnership**
2. **Affiliate Marketing**
3. **Paid Post**
4. **Product/service sales**

Steps to Create a Profitable Blog

1. Choose a suitable niche – (Certain Category)
2. Register for a domain name & get a web hosting (Blue Host, Hostinger, Godady etc)
3. Setup your Website Properly.
4. start writing valuable content & bring some traffic
5. Monetize Your Website with AdSense or other monetizing sources.

Technical terms of Blog

1. Niche
2. Key Word
3. SEO
4. Backlink
5. Ranking
6. Traffic

Step 1: Select the niche

Life experiences. Everyone has lessons they have learned through life experience. Sharing this knowledge can be incredibly helpful to others in similar situations. Now we will select the Niche Considering various aspects –

- ✓ The subject you have interest
- ✓ The subject which has readers demand
- ✓ The subject which is Advertiser friendly
- ✓ The subject which may cover a continuous updates
- ✓ The subject which has strong keyword acceptance
- ✓ The subject which has low competition
- ✓ It must be profitable
- ✓ It must be sustainable

Example of some common blog niche are :

- ❖ Self-improvement
- ❖ Investment
- ❖ Making money online
- ❖ Beauty treatments
- ❖ Weight loss and fitness
- ❖ Health
- ❖ Relationships and dating
- ❖ Pets
- ❖ Tech gadgets
- ❖ Personal finance

Step 2 : Pick a domain name for your website.

You Can't say here what is in name. at here, name plays a big roll. So you must choose a good name. People will search with the keywords which should be related or near to the name of the website. A good blog name should be descriptive so that potential visitors can instantly tell what your blog is about just from the name.

Here name refers to Domain name.

If you are blogging about one specific topic then you will definitely want to include that in some way when you pick a domain name. Try not to get hung-up on just one word.

Note: Only dash (-) can be used , if necessary in domain name and no spaces or punctuation can be used.

If you find that the name you wanted is already taken then you may modify your search.

Step 3: Get your blog online

Now that you've got a name picked out it's time to get your blog online. This might sound hard or technical, but the steps below will walk you right through and make the process easy.

To get your blog up and running you need two things: blog hosting (also known as web hosting) and blogging software. The good news is that these typically come packaged together.

A blog host is a company that stores all of the files for your blog and delivers them to the user when they type in your blog name. You must have a blog host in order to have a blog.

You also need to have the software to build your blog. Today guide I will be showing you how to build a blog using the WordPress blogging software, because it is the most popular, customizable, and easiest to use.

The web host I recommend, and the one I show you how to use in this guide, is Hostinger. I personally use Hostinger and I recommend them for all new bloggers because:

- They will register your custom domain name for free, making sure no one else can take it.
- They have a 30 day money back guarantee if you are unsatisfied for any reason.
- They offer a free, automatic installation of the WordPress blogging software (which I show you how to use in this guide).
- They offer reliable web hosting that has been recommended by WordPress since 2005 and they currently host over 2 million blogs and websites.
- They have helpful 24/7 customer service via phone or web chat.

Select your plan

Now select your plan. I recommend that beginning bloggers get the basic plan. Click “Select” to choose your plan.

Create your account

Use Google Single Sign-On to make creating your account even easier.

Logging in

If you are not already logged-in from the previous step, go to Bluehost.com and click “Login” on the top right to bring up the login screen. You can then login using your domain name and the password you set in the previous step. If you have misplaced your password you can reset it by clicking the “Forgot Password” link.

Changing your blog design

Once you login you will be in the WordPress dashboard. This is where you can make any changes you want to your blog.

Everyone has a different idea of how they want their blog to look. One of the great things about WordPress is that you can change your entire layout and design with just a few clicks.

In WordPress, blog layouts are known as “Themes”. What is a blog theme? Themes control the entire design of your WordPress blog. To change your theme you are going to click on the “Appearance” tab on the left menu.

WordPress : Customise your Website

The screenshot displays the WordPress dashboard interface. At the top, the header bar includes the WordPress logo, the site name "Scott Chow's Blog", a notification icon with "0", a "New" button, and a link to "MOJO Marketplace". On the right side of the header, it says "Howdy, Scott" next to a user profile icon and a "Help" dropdown menu.

The left sidebar contains a menu with the following items: Dashboard, Jetpack, Posts, Media, Pages, Comments, Contact, Marketplace, and Appearance. The "Appearance" menu item is highlighted with a blue background. Below the "Appearance" menu, there are links for "Themes", "Customize", and "Widgets".

The main content area is titled "Themes" and shows a count of "4" installed themes. It includes tabs for "MOJO Themes", "WordPress.org Themes", and an "Add New" button. A search bar labeled "Search installed themes..." is positioned below the tabs.

Two theme cards are visible. The first card is for the "Twenty Twelve" theme, which is marked as "Active". It features a preview image of a landscape with a blue sky and a golden field. Below the preview, there is a "Customize" button. The second card is for the "Twenty Fifteen" theme, which is not active. It features a preview image of a pier over the ocean at sunset. Below the preview, there is a "Customize" button.

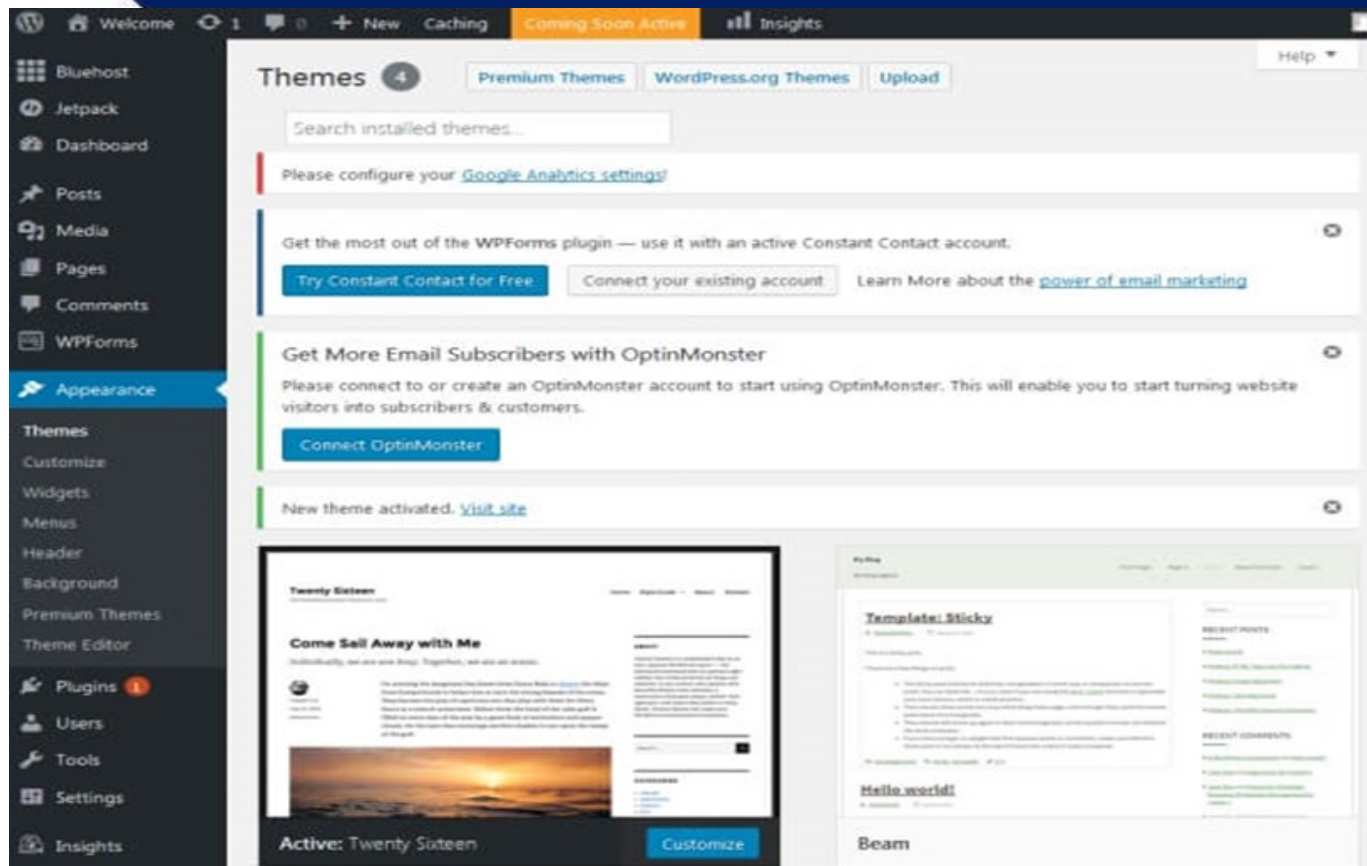

WordPress : Customise your Website

You will see several free WordPress themes are already installed on your blog: Twenty Seventeen, Twenty Sixteen, etc. These are well-designed, clean-looking themes that can work for just about any type of blog. In fact, many of the world's top bloggers use one of these themes.

Unless you have a very specific design in mind for your blog, I suggest you use one of these themes to start with. For our example, let's use the "Twenty Sixteen" WordPress theme. In order to activate the theme on your blog, hover over the theme and click the "Activate" button. That's it! You have changed the entire design of your blog with just one click!

WordPress : Customise your Website

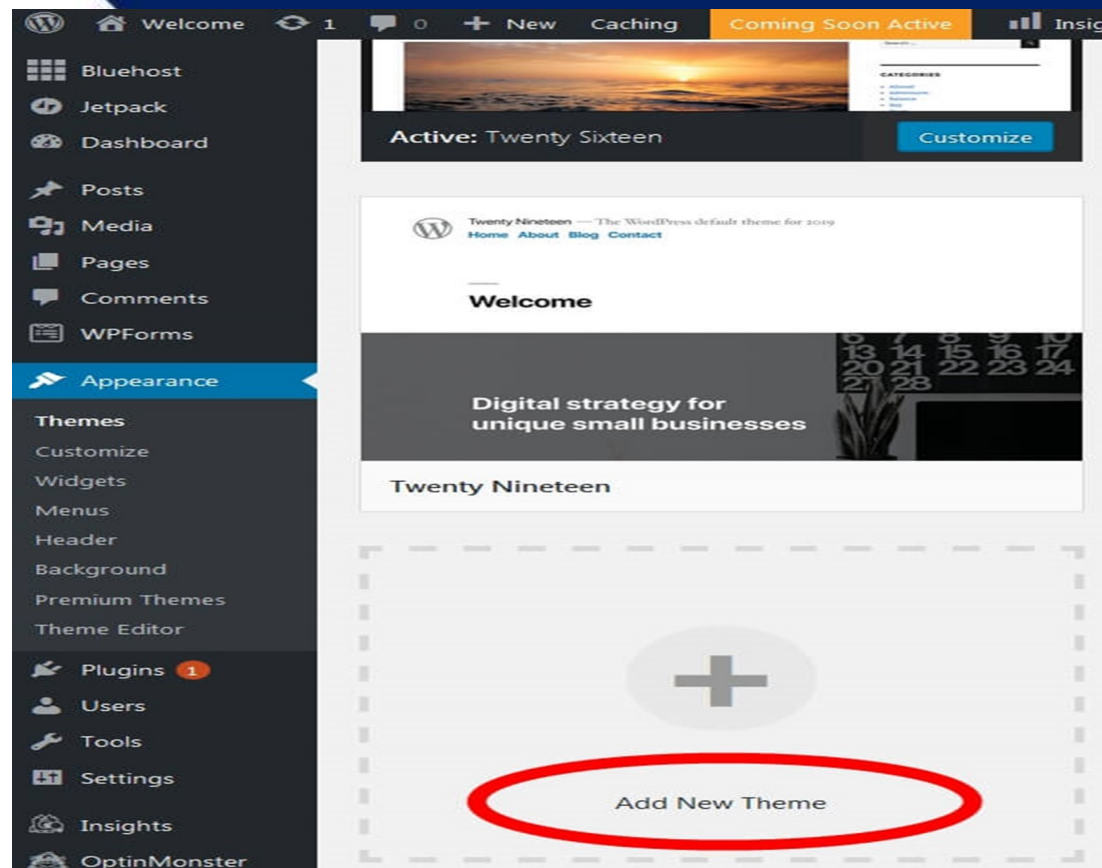

WordPress : Customise your Website

If you don't like any of the themes that are already installed you can easily choose from thousands of other free WordPress themes. To install a new WordPress theme, click on the "Appearance" tab on the left menu and then click "Add New Theme".

WordPress : Customise your WebsiteTheme

WordPress : Customise your WebsiteTheme

This is the WordPress theme search screen. There are thousands of themes to choose from. You can change your entire design at anytime simply by activating a new WordPress theme. To find a theme you like, I suggest you click on the “Popular” tab and start browsing. When you find one that you like click the blue “Install” button.

WordPress : Customise your WebsiteTheme

The screenshot displays the WordPress dashboard for 'Scott Chow's Blog'. The left sidebar shows the 'Appearance' menu highlighted, with sub-items: Themes, Customize, Widgets, Menus, Header, Background, MOJO Themes, and Editor. The main content area is titled 'Add Themes' and includes an 'Upload Theme' button. Below this, there are filters for '498' themes, categorized by 'Featured', 'Popular', and 'Latest', along with a 'Feature Filter' button. A search bar labeled 'Search themes...' is present. The 'Filtering by' section shows 'Blue' and 'Two Columns' selected. Two theme cards are visible: 'SuevaFree' and 'Metro CreativeX'. The 'SuevaFree' card shows a preview of a website with a 'Details & Preview' overlay. The 'Metro CreativeX' card shows a preview of a website with a 'Latest news' section. Both cards have 'Install' and 'Preview' buttons.

WordPress : Customise your WebsiteTheme

Once the theme is installed click “Activate” to activate the theme on your blog. To see your new theme in action, go to your blog and take a look!

WordPress : Important Customisation

Some other activities you need to control with WordPress :

1. Delete all pre exist pages
2. Delete all pre installed plugins
3. Install Rank Math SEO plugin to get on page SEO Guide
4. Install Google site kit plugin for Search Console, adsense and analytics
5. Install insert header and Footer Plugin for html code insert
6. Install WebPushr plugin for notification
7. Install WPS Forms for future use of forms

WordPress : Write your 1st Blog

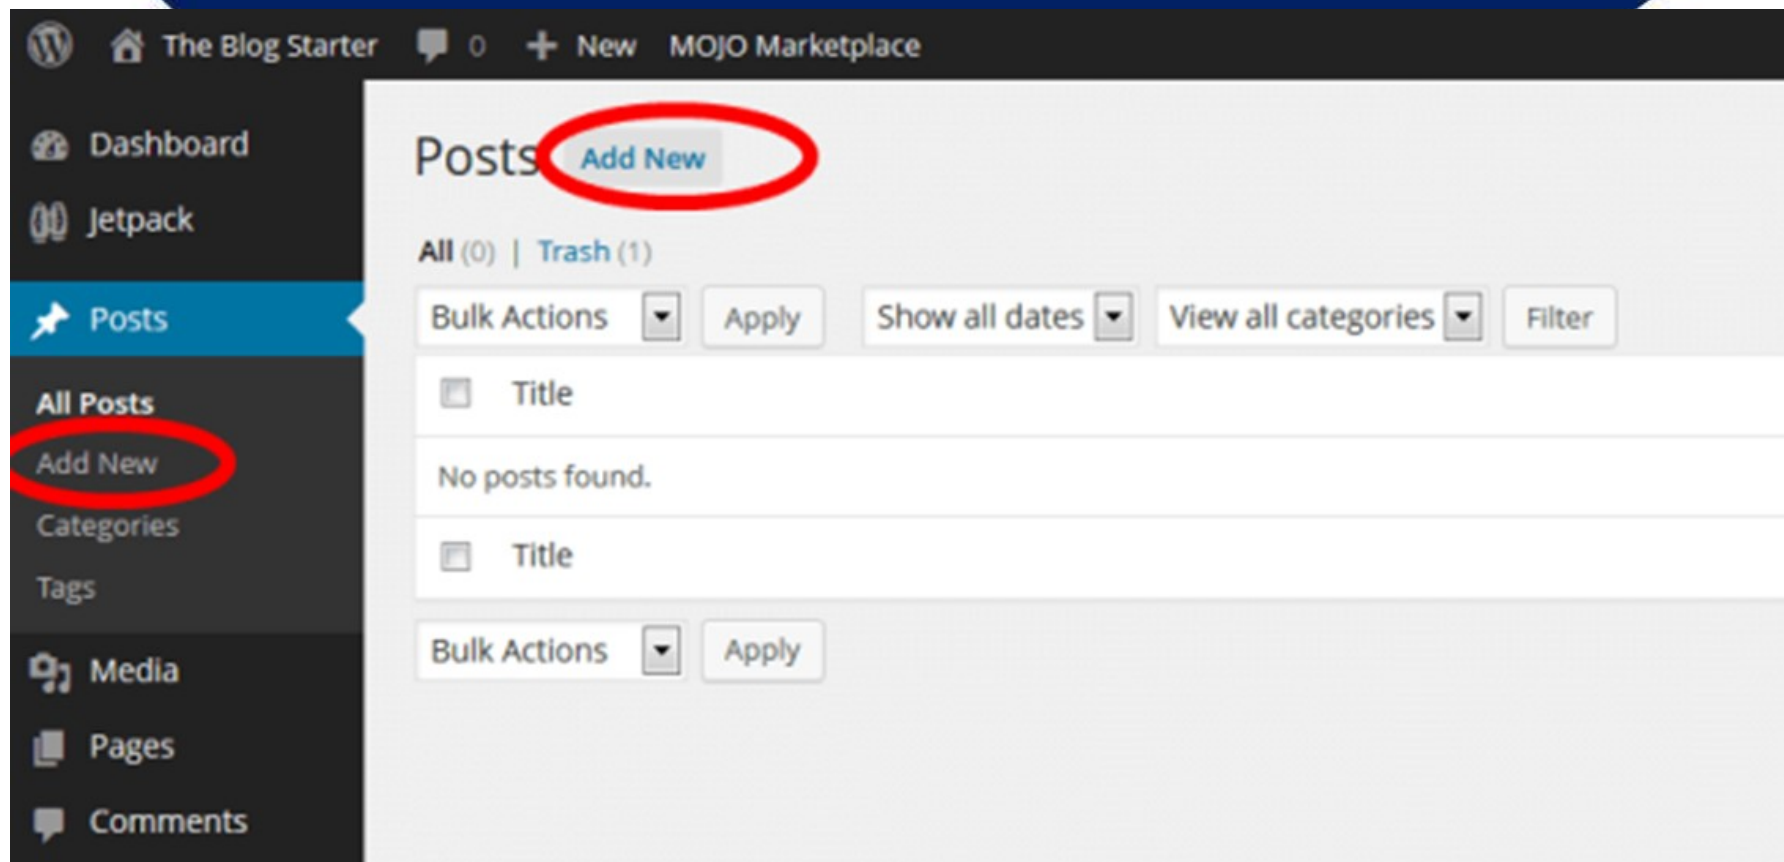

Now that your blog is up and running it's time to actually do some blogging! Let's create your first piece of content. Go to the left menu and click on "Posts".

WordPress : Post your Article

Write New Post

WordPress : Post your Article

The screenshot displays the WordPress post editor interface. At the top, a navigation bar includes a WordPress logo, a plus icon, and various editing tools. A blue 'Webpushr Preview' button is visible. The main content area features a large text input field with the placeholder 'Add title' and a smaller input field below it with the placeholder 'Type / to choose a block'. A black plus icon is located to the right of the second input field. On the right side, a sidebar contains several settings sections: 'Status & visibility' (with 'Public' and 'Immediately' selected), 'Post Format' (set to 'Standard'), 'Stick to the top of the blog' (unchecked), 'Pending review' (unchecked), 'Author' (set to 'Editorial Team'), 'Permalink' (set to 'VIEW POST'), and 'Categories'. The bottom of the sidebar shows a 'Table of Contents' link.

WordPress : Post your Article

Navigation bar: WordPress logo, + icon, editing tools, Webpushr Preview button, Save draft, Preview, Publish, settings, user profile, 2 / 100.

Main content area:

- Input field: Add title
- Input field: Type / to choose a block
- Block selection icon: +

Right sidebar settings:

- Status & visibility: Public, Immediately
- Post Format: Standard
- Stick to the top of the blog: ☐
- Pending review: ☐
- Author: Editorial Team
- Permalink: VIEW POST
- Categories: [empty]

Table of Contents

Publish your article and give it wide publicity

Once you have finished your post just click the “Publish” button on the top right side of the screen to publish the new post.

Don't forget to Give Featured image, tag, suitable category and SEO Compatible

Now you will get a link of your newly published post. Copy it and forward to the social media groups as much as possible.

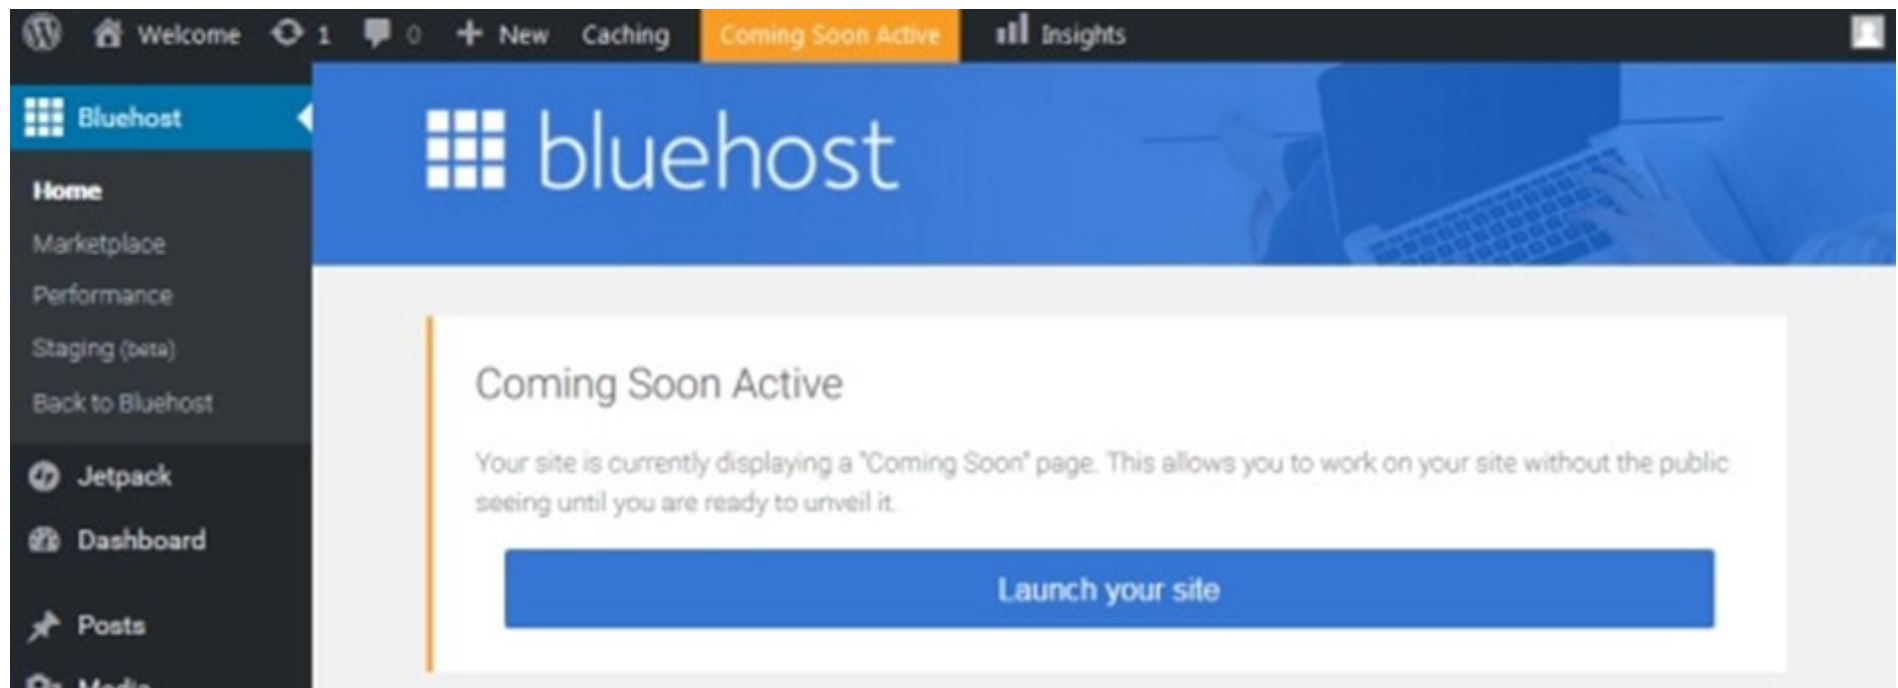

Publishing Your Blog

Even after you have written a post your blog may still be showing a placeholder page.

When you are ready to make your blog public for the first time, just click the “BlueHost” menu at the top left of the menu in your WordPress dashboard then click the blue “Launch” button to remove the placeholder page and launch your blog.

Publishing Your Blog

Promote Your Blog

Post Regularly

Post content regularly. Create an editorial calendar and stick to it. A good blogger posts at least once per week to start. If you have long lapses between posts, your followers will drop off and your growth will be severely hampered. It's not easy to post on a schedule, but it's something you absolutely must stick to.

Monetize your Blog

- **Once you have published atleast 20 articles, you may submit it to Adsense for monetization.**
- **Before this you must create your Adsense Account.**

Signup to AdSense

Google AdSense Help

Describe your issue
